

REPORT OF THE BOARD OF WATER COMMISSIONERS

To the Inhabitants of the Town of Abington:

The Board of Water Commissioners respectfully submits the following report for the Abington Water Department for the year 2006.

We continued actively flushing the water system to maintain the water quality throughout the town. The entire system was flushed both in the spring and fall of 2006. Additional flushing was performed locally as necessary.

During the past year we enhanced our aggressive water main replacement program by upgrading the water mains on Centre Avenue, Jennings Drive, and Russell Lane.

Again the professionals within the department accomplished many task in delivering an adequate supply of Safe Drinking Water to the residents of Abington. Following is a list of some of the major duties performed by your water department:

Main Repairs	7
Service Repairs	3
Hydrant Repairs	5
Hydrant Replacements	5
Meter Replacements	130

The water department completed the installation of a water system computer monitoring program. This program allows the staff to have access to all system records electronically in the maintenance vehicles. This will increase productivity of the department.

The Commissioners would like to recognize and thank the employees of the water department. They again have performed their duties with diligence and pride. We are only as good as the people we surround ourselves with. And we at the Abington Water Department are fortunate to have the professionals who perform admirably. Thank you for a job well done.

“With Water Works Pride”

Abington Board of Water Commissioners

Steven D. Bradbury, *Chairman*

John Warner, *Secretary*

Richard Muncey

Daniel F. Callahan, *Superintendent*
